Elham Saboori

Senior Back-End Developer @ Unity | Computer Engineering
Toronto, Ontario, Canada

Summary

With over seven years of experience in software development, I have honed my skills in C#, .NET, SQL, and other technologies that enable me to create robust and efficient back-end solutions. I am currently a senior back-end developer at Unity, where I play a pivotal role throughout the entire development lifecycle, from defining requirements to designing service architectures, implementation, testing, and deployment.

In addition to my technical expertise, I also possess proficiency in the DevOps stack, with a focus on technologies such as Kubernetes, Docker, and Traefik. I have contributed to essential features such as setting up authentication and authorization processes, configuring gateways, and implementing billing processes for Unity's platform that empowers 3D modeling applications. I am passionate about learning new technologies and collaborating with other developers to deliver high-quality products that meet the needs of our clients and users.

Experience

Unity

Senior Back-End Developer

February 2022 - Present (4 years 4 months)

- Played a pivotal role throughout the entire development lifecycle, from defining requirements to designing service architectures, implementation, testing, and deployment. Which facilitated the creation of a platform to empower 3D modeling applications
- Contributed to essential features such as setting up authentication and authorization processes, configuring gateways, and implementing billing processes.
- Responsible for introducing new features and addressing issues in the services provided, particularly focusing on collaborative features.

Morgan Stanley

Software Developer

July 2018 - February 2022 (3 years 8 months)

Montreal, Canada Area

- Involved with different stages of architecture design for new projects
- Designed, developed and supported multiple services written in C#/ .Net Core
- Responsible for configuration deployment of services using Docker
- Guided and mentored junior software programmers and research assistants

TRU Simulation + Training

Software Developer

February 2015 - July 2018 (3 years 6 months)

Montreal, Canada Area

- Designed, developed and maintained a flight training system that is successfully integrated into and widely used in all company products — C#, WPF, LINQ, C++, Socket programming, XML, Git
- Designed and implemented a C++ code generator for flight simulator communications subsystem — C#, Task Parallel Framework, Entity Framework, LINQ, SQL Server, Git
- Maintained a core flight simulator testing and diagnostics software that is widely used by test engineers, including major performance improvements — C#, WinForms, SQL Server

Ferdowsi University CERT Laboratory

Web Developer / Security Analyst

May 2011 - September 2013 (2 years 5 months)

Iran

- Developed sample web applications with varying degrees of security for competitions and training purposes — ASP.NET, Javascript, SQL Server
- Performed security assessment and standards-compliance verification of several web applications and prepared advisory report for several customer companies

Education

Ferdowsi University of Mashhad

Bachelor's Degree, Computer Engineering · (2008 - 2013)
